

# Legend

The legend defines four relationship types between concepts, each represented by an oval containing the concept name. The relationships are indicated by arrows with different line styles and colors:

- Child → Parent:** A solid black arrow pointing from the 'Child' oval to the 'Parent' oval.
- Synonym — Synonym:** A solid black line connecting two 'Synonym' ovals.
- Child - -> Implied Parent:** A dashed black arrow pointing from the 'Child' oval to the 'Implied Parent' oval.
- Implied Synonym - - - Implied Synonym:** A dashed black line connecting two 'Implied Synonym' ovals.

Below the relationship types, three colored arrows indicate the source of the concepts:

- Green arrow:** From Established Standards
- Blue arrow:** From Meta-level Collections
- Black arrow:** From Papers and Other Documents
